

S. Main Bridge

Reconstruction Project Notice

Starting on Thursday and Friday, June 2nd and 3rd the contractor will be setting up traffic control at the S. Main Bridge reconstruction site. One-way traffic will be controlled by signal lights on either side of the bridge. For the most efficient traffic flow please obey the signal lights. For ease of travel we recommend going around the 61 by-pass to get to the far south side of Maquoketa.

The project is tentatively scheduled to be completed by Oct. 15, 2022.
